## DETAILED ACTION

### *Oath/Declaration*

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

### *Specification*

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The disclosure is objected to because of the following informalities: page 5, lines 2 and 3, "rotor 8" should be changed to -- rotor 6 --. Appropriate correction is required.

### *Claim Objections*

4. Claim 1 is objected to because of the following informalities: - page 10, line 11, "means to bias" should be changed to -- *means for biasing* --; page 10, line 19, "adjacent vanes" should be changed to -- *adjacent paddles* --. Appropriate correction is required.

Claims 2-12 are objected to by virtue of their dependence on claim 1.

Art Unit: 3748

***Prior Art***

5. The IDS (PTO-1449) filed on June 3, 2004 has been considered. An initialized copy is attached hereto.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of eight patents: Freeman, Jr. (U.S. Patent Number 23,764), Hall (U.S. Patent Number 68,186), Voorhies (U.S. Patent Number 390,044), Wilber, Jr. (U.S. Patent Number 1,349,353), Lister (U.S. Patent Number 1,972,744), Hunter (U.S. Patent Number 2,536,938), Baudin (U.S. Patent Number 4,415,322), and Oetting (U.S. Patent Number 5,163,825), each further discloses a state of the art.

***Conclusion***

7. This application is in condition for allowance except for the following formal matters: as set forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
